### An Intelligent Legal Department

Imagine having sophisticated data analytics at your fingertips, allowing you to understand, analyze and optimize your legal function.

A Legal Department that can swiftly articulate its workload, identify skills gaps and adjust resourcing decisions will survive (and thrive) in a world of rapidly and ever-expanding regulatory change.

### Why do you need Legal Department Intelligence?

While every Law Department is different – and some teams, budgets and regulatory pressures are bigger than others – every business can benefit from additional insight on capacity, capability and cost.

Xakia's tools gather and synthesize data, which allows you to:

- **Build a more productive team.**

Improved visibility eliminates redundancy and “who’s doing what” guesswork and duplication.

- **Match the right resources to the right work.**

Better deploy your team and monitor your law firms’ projects, tasks, deadlines and budgets.

- **Control your budget.**

Watch budget benchmarks in real time – for individual matters, categories of work, each firm or overall – so you are never caught by surprise.

- **Tie your team to the company strategy.**

Stay focused on what matters – and demonstrate your value to the C-suite and to your internal business clients.

- **Save hundreds of hours every year.**

Automated dashboards and reporting help you fight your everyday fires, slashing the time spent on administrative work.

# FEATURES

## Legal Intake and Triage

- Customize request types
- Receive and allocate work
- Central portal

## Matter Management

- Rapid matter input
- Status updates for visibility
- Manage tasks and deadlines

# FAQs

## How secure is my data?

All data is stored on the Microsoft Azure servers. Azure's compliance with a broad set of international and industry-specific compliance standards and Xakia's rigorous internal practices ensure your data is well protected.

## Can I import and export data?

Existing data can be easily imported into Xakia using our standard templates. We would be happy to assist you with this. Data captured in the Xakia system can be exported at any time into a range of formats.

## How is the technology implemented?

Xakia is a cloud-based system, so there are no excessive implementation costs or processes. You simply fill in an online form to capture details about your team and its structure, the types of work you do and the law firms you engage with – then you are ready to begin.

## How do I generate reports?

Report formats can be automatically generated or tailored to suit your needs. Once you perfect your format, it can be set to 'auto-generate' and stored in the archive to deploy whenever you need it.

## Can we tailor our Xakia platform?

Yes! We would be happy to assist you with modifications. Contact a Xakia rep for more details.
